

Rolls-Royce

As an Occupational Physician reporting directly to the Global Head of Health, you will play an integral role within the Health Team supporting the delivery of the Global Health strategy but also delivering Occupational Health and specialist services to our businesses in the UK. The Health Team sits within the Global HSE team, whose vision includes zero harm to people, which will give you an opportunity to work within an integrated HSE team which includes occupational hygiene, wellbeing, chemical safety, sustainability and environment teams

As well as working for an internationally recognised brand, this is a GMC approved training post set in an environment which offers a broad training in Occupational Medicine and experience of related specialities. Rolls-Royce will support you to complete specialist training and obtain the MFOM.

Key Accountabilities

- Support the delivery of the Health strategy as part of the Health team
- Support development and implementation of global OH policies and procedures
- Support the delivery of OH service to the UK businesses including health surveillance & screening, case management etc.
- Input into investigation and reporting of all aspects of occupational illness and risk communication.
- Support UK businesses in maximising employee health and productivity by providing clinical input and partnership to business leads
- Support health emergency and business continuity planning (pandemic, radiological etc.)

The responsibilities will complement the requirements of the FOM training curriculum for the training post.

Qualifications/Experience

- MBBS or equivalent medical qualification
- Be eligible for full registration with, and hold a current licence to practise from the GMC at intended start date
- Fulfil the entry criteria for entry into specialist training in Occupational Medicine
- Ability to apply sound clinical knowledge and judgement
- Experience in a range of medical specialities including acute and chronic disease management particularly with an alignment to Occupational Medicine e.g. Rheumatology is desirable
- Demonstrates good understanding of medical ethics and confidentiality
- Strong inter-personal and communication skills
- Previous training in Occupational Medicine e.g. DOccMed is advantageous

Rolls-Royce

- Previous experience of clinical audit and clinical research is advantageous

Applicants must fulfil the current entry criteria for specialist training in Occupational Medicine. Applications will be considered from individuals who are looking to work flexibly. This role is based in Derby with some requirement to travel within the UK. Create momentum. Join us and you'll develop your skills and expertise to the very highest levels, working in an international environment for a company known the world over for excellence and innovation.
